Non−normality of residuals and outliers
Dots should be plotted along the line
Residuals
Theoretical quantiles (predicted values)
(Intercept)
keymotive_fulfillemt_1_cwc
Random effect quantiles
Standard normal quantiles
Non−normality of residuals
Distribution should look like normal curve
Density
Residuals
Homoscedasticity (constant variance of residuals)
Amount and distance of points scattered above/below line is equal or randomly sp
Residuals
Fitted values
